RE: State Application Number 24700-NSP

Dear Mr. Cusma:

We have received your application for the removal of 150 cubic yards of contaminated sands located at Willamette River Mile 6.0, Portland, Multnomah County. The Division of State Lands requires a permit if you plan to remove, fill or alter 50 cubic yards or more of material within the banks of a waterway or designated wetlands.

On September 26, 2001, the Division was informed by DEQ representative Tom Gainer of DEQ's intent to waive the DSL permit requirements for this project pursuant to the provisions of ORS 465.315. At the request of Mr. Gainer, the Division provided to DEQ on September 27, a list of the conditions the Division would have placed on the proposed project if regulated by our agency.

Given DEQ's invocation of ORS 465.315, the Division finds that no removal/fill permit pursuant to ORS 196.800 *et seq.* is required for this project as described in the application and supplemental materials.

Please note that you must also receive authorization, when required, from the U.S. Army Corps of Engineers and local planning department before beginning construction.

If you have any questions, please call Kirk Jarvie at 503-378-3805, extension 320.

Sincerely,

Lori Warner
Manager
Field Operations—Western Region
